Profile

I am a final-year student in IT Systems Programming, based in Torres Vedras, Portugal, looking for my first opportunity in the tech industry. I am seeking an internship or entry-level role in software development, web design or cybersecurity, where I can learn from experienced professionals and contribute from day one.

Experience

Jul 2025 — present

Waiter
Restaurante O Polvo

- Delivered attentive, accurate customer service through direct interaction with guests.
- Managed multiple tables during peak hours, prioritising tasks under pressure.
- Coordinated with floor and kitchen staff to keep service running smoothly.
- Handled requests and complaints with diplomacy and a solution-focused approach.

Jul 2026 — Sep 2026

Programming Intern (work placement)
LabCenter · Torres Vedras

- Work placement for the vocational diploma in IT Systems Management and Programming (ESCO).
- Built an Android app in Java (Android Studio) to control an Arduino Uno over Bluetooth (HC-05 module).
- Integrated an LED, a relay, a servo motor and a DHT11 temperature and humidity sensor.
- Prepared bootable USB drives with Rufus and Ventoy to install Linux and Windows.

Education

2024 — 2027

Vocational Diploma in IT Systems Management and Programming
ESCO — Escola de Serviços e Comércio do Oeste
Final year in progress.

Projects

O Polvo: restaurant website with booking system
Digital menu, online bookings and an admin panel, on a dependency-free Node.js server.
HTML · CSS · JavaScript · Node.js · github.com/samuca13062009-cell/o-polvo

SkillConnect: web platform and Android app
A platform that brings together people with different skills, first as a website and then as an Android app.
Kotlin · Jetpack Compose · SQLite · github.com/samuca13062009-cell/skillconnect-android

Saltaplanetas: 3D browser game

A 3D game where the player jumps between planets, with scenery, lighting and physics coded from scratch.

JavaScript · Three.js · WebGL · github.com/samuca13062009-cell/saltaplanetas

Arduino control over Bluetooth

An Android app in Java that controls an Arduino Uno over Bluetooth, built during my internship at LabCenter.

Java · Android Studio · Arduino · Bluetooth
